	3.	Prior to June 1951, a military research institute was located on the west side of Fehervari Street in Budapest. In June 1951, the building, which up to the spring of 1950 had belonged to the Gamma Plant, housed a laboratory, a materials testing shop, and some minor workshops of the research institute. About 60 persons including civilians were employed at the institute. He military guard was seen at this building. The ground floor housed workshops of the Gamma Plant as late as June 1951.							
	4.	Prior to June 1951, three four-story buildings on the west side of Darbczi Street near the intersection with Dibszegi Street in Budapest were guarded by soldiers who were green service color. Source observed bales of military uniforms being taken into one of these buildings, each of which was about 60×20 meters. The buildings reportedly housed a central depot of the Hungarian Army. Hospitals were located opposite the depot and on the east side of Darbczi Street. (3)							
	5.	During the period from the fall of 1950 to the surver of 1951, ammunition boxes were repeatedly unleaded by soldiers near the Nagytetbny-Dibsd (Q 48/H 41) railroad station. The ammunition, probably artillery ammunition, was trucked from the railroad station to the ammunition depot immediately northwest of Diosd (Q 48/H 41), east of the road to Toerock-bhint (Q 48/H 41). The depot was built into a hill between triangulation points 210 and 187 and was protected by a layer of rocks about 10 meters thick, from which several ventilation shafts projected. Three entrance gates were observed. The trucks which entered a depot returned empty. A standard-gauge track was in front of the depot which was guarded by soldiers 25X1	a.						
	6,		1 .						
25X1X		unit began its surmer training near the Yugoslav border in April 1951. An occupied military cantonment was observed in the woods between Devecser (P 48/D 38) and Nemeshan (P 48/D 27), on both sides of the road connecting these two places.							
25X1	7.	Lillafuered which is located west of Miskolc (R h9/J 87) and immediately southwest of Mamor (R h9/J 77), that Mungarian government officials from Miskolc, allegedly on Soviet orders, had inspected the villas south of the Palota Motel and that an air raid shelter which had been built during the war on the forth side							
25X1 25X1X		of the Miskole-Hamor road was being reconditioned. a woman who had come from Lillafuered to Sopre 18/X 63) that the Palota Hotel and the buildings inspected in the spring of 1951 were scheduled to be evacuated by September 1951.	25X1						
	8	Prior to March 1951, Mangarian AAA soldiers wearing white-bordered red epaulots were seen in the barracks installation east of the church of Suettoer (P 48/X 83). The barracks installation was reconstructed after the war. (5) Source stated that the localities of Suettoer and Eszterhaza (P 48/X 83) were merged and redesignated Fortoed in June 1950.	1						
	•								
	\$	Frier to September 1951, the Hangarian towns and localities had no military registration officials attached to their administrations. Such officials are only attached to registration offices of the municipal police.							
	10.	In July 1951, Soviet motor vehicles were observed entering and leaving a former warehouse of the state tobacco monopoly at the intersection of Obudai Quay and Haj@gy2r Street in Budapest VI. It appeared to source that the building housed a Soviet military depot.	•
